Planned expansion for Penguin site

Dear Emil,

Greetings!

Thank you for your call to detail the plans for an expansion of the Penguin clinic on the ground floor, and the news that a new doctor will be starting with you in the near future.

Having seen the outstanding response you have received to the current project, I believe this is the obvious next step to increase the services to the Penguin community.

As discussed on-site some months ago, the ground floor could provide an opportunity for a variety of allied health services to have a presence in Penguin on a regular basis.

I note that the Central Coast Council will be involved as a key player in the project, and am very happy that they are continuing their strong support of your Clinic. The expansion will also help to increase the community value, and expand the opportunities for links with other groups.

I believe your operation is already a strong example to other communities on how to provide and build on current services, and I am only too happy to support the bid for funding support under the National Rural and Remote Infrastructure Progra

Feel free to contact me if you have any queries or if I can be of further assistance.

Kind Regards,

Sid Sidebottom MP
