

**Sid Sidebottom MP** ...for a fair go  
FEDERAL MEMBER FOR BRADDON

22 January 2012

## MEDIA RELEASE

### NBN Discovery Truck Heading Our Way

Residents throughout the north-west will soon have another opportunity to experience first hand the benefits that high-speed broadband via the NBN will enable in their homes, schools and businesses, with the arrival of the NBN Co Discovery Truck.

Sid Sidebottom, Federal Member for Braddon said that he was delighted that the truck will be reaching such a wide range of communities in our region. "It's fantastic that many communities from the west coast and right along the north-west will have the opportunity to see for themselves the tremendous benefits that the NBN roll out is going to provide for us". Mr Sidebottom said.

As part of its nationwide tour, the truck is visiting north-west Tasmania to show communities how the NBN works and how it will impact their lives in key areas such as health, education and business.

The NBN Co Discovery Truck is a 23-tonne mobile interactive demonstration centre designed to bring the benefits of high-speed broadband to life for residents via case studies, demonstrations and interactive displays.

"By visiting the truck, people will be able to learn about the technologies being used in the NBN rollout, how they work and what they mean for their access to broadband in the future," Mr Sidebottom added. "This is an exciting time to be involved in the new NBN technology and the north-west of Tasmania is at the forefront of the rollout. It offers enormous potential for businesses, health, education, and families alike."

Bookings can be made for the NBN Co Discovery Truck by visiting NBN Co's website at [www.nbnco.com.au/demos](http://www.nbnco.com.au/demos) and more information about current initiatives can be found by going to [nbn.gov.au](http://nbn.gov.au)
